Equipment Handover

Case Study Cooperative and Autonomous Systems

Each team receives one kit, consisting of a **WAVE ROVER** and the **sensor box** mounted on it, including all cables. The kit number is the team number. By signing, the team leader confirms receipt of the kit and takes responsibility for it on behalf of the team. The kit is to be handled with care, the rover firmware must not be changed, and the kit including all cables is returned complete at the end of the course.
